Review on educational program of bachelor's degree "Informatics" Pavlodar Pedagogical University

The educational program contains goals, passport, list of qualifications and positions, qualification characteristics of the graduate, sphere, objects, subject, types, functions and areas of professional activity and a map of the educational program. The educational program "Informatics" was developed in accordance with the State Educational Standard of the Republic of Kazakhstan, the Professional Standard of a Teacher, the National Qualifications Framework, and is coordinated with the Dublin descriptors and the European Qualifications Framework. The program is based on a competency-based approach to design and has a modular format.

The educational program uses scientifically based approaches to planning, methodological support, learning technologies. The resulting academic integrity of normative and educational documents ensures effective management of the implementation arrangements of educational programs.

The educational program provides for the following direction of training bachelors: 6B01530 "Informatics".

Cooperation with employers is of a systemic nature: there has been a practice of coordinating the content of the educational program with employers in the region; involving employers in the management of practices, reviewing theses and methodological developments of teachers; inclusion of employers in state certification commissions, assessment of employers' satisfaction with the quality of training.

The modular structure of the Program allows you to obtain integrated knowledge in modules containing interrelated disciplines. The modular approach is designed to ensure the gradual development of the educational program.

The most important component of the educational program is educational (pedagogical), psychological and pedagogical, industrial (pedagogical) and prediploma practice with the subsequent preparation of the thesis on the basis of schools in the city and region, which are the bases of practice.

The developed educational program "Informatics" can be approved and recommended for its implementation in the PPU for the preparation of bachelors.
