

**On the work of students who have passed pedagogical practice
in MSO "School No. 25 of Pavlodar"**

OPINION

Students of group PiP-21S of Pavlodar Pedagogical University, specialty EP 6V01110 "Pedagogy and Psychology" from 18.01 to 12.02.2021, passed pedagogical practice at KSU secondary school No. 25 in Pavlodar. School psychologist Ordabayeva Zhanar Beisenbevna became the leader in the school practice.

During the practice, students have established themselves as educated specialists with great creative potential. Students carried out work on the implementation of professional activities aimed at preserving the psychological, somatic and social well-being of students. Having familiarized himself with the Procedure for conducting educational, propaganda work with teachers and parents, he made his contribution to the selection and maintenance of current topics.

During the practice, the trainees used various methods, questionnaires and online tests to diagnose individual students, complete classes. After diagnostics, according to the results of each class, they learned to prepare and conduct correctional and developmental work according to the plan. In general, educational, preventive work was based on distance learning. During the practice, there was a high theoretical preparedness of students. Show your full knowledge in practice. We hope that the experience gained from the practice held at the school will be used in the future.

We thank the leadership of the university and the head of the general education program A. Zh. Aposhava, the head of the practice Makhmetova NK for the organized training and cooperation of students of the specialty "Pedagogy and Psychology".
