

## Review of the Educational program 7M01541 Chemistry

I, Khavdyl Zhanargul, believe that choosing a university is a meaningful and complex decision for every person. To them. A. Margulan. Since 2008, he studied at PPU as a future teacher. From 2020 to 2022, he graduated from Pavlodar Pedagogical University at the Higher School of Natural Sciences with a degree in Chemistry. I would like to express my sincere gratitude to my university-Pavlodar Pedagogical University.

The educational institution for the training of teachers annually increases not only the number of students, but also the qualitative composition. The teacher is a profession that goes hand in hand with one of the special challenges and hobbies.

This university had a great influence on how I became a good specialist in pedagogy. The scientific supervisor Mukanova Roza Zhumkenovna, Ph. D., successfully coped with the difficulties that she faced along the way, worked hard and showed the right path. The entire teaching staff of the Higher School of natural sciences: Mukanova Roza Zhumkenovna, Yerkibayeva Meruert Kuandykovna, Achkinadze Olga Semenovna, Baimurat Maira express their gratitude.

One of the most valuable things at the university is hospitality, willingness to help with any issue, and most importantly-the quality of Education.

Master of Pedagogical Sciences

Graduated from A. Margulan University
